## *SEED POTATO CERTIFICATION SCHEME*

### *LIST OF PRE-BASIC AND BASIC SEED POTATO CROPS INSPECTED FOR MARKETING*

**2018**

Ireland is designated by the European Union (EU) as a Protected Region for seed potatoes. Only Pre-Basic and Basic grades of seed potatoes may be marketed in Protected Regions. Packages of Basic grade seed potatoes carry a white label and Pre-Basic grades carry a white label with a diagonal violet line. Lower grade Certified seed potatoes, which carry a blue label and are produced outside of the Protected Regions, must not be marketed in Ireland.

**CLASSIFICATION AND UNION GRADES:** All crops are classified according to Union grades:

	Pre-Basic		Basic		
Grade	PBTC	PB	S	SE	E

The marketing of Union grade basic seed potatoes is restricted as follows:

- For seed potato production, potatoes that fulfil the conditions for Union Grades S and SE
- For potato production, potatoes that fulfil the conditions for Union Grades S, SE and E

The maximum number of field generations allowed for pre-basic potatoes is four. The maximum number of generations of basic potatoes is four and the combined generations allowable of pre-basic potatoes in the field and basic potatoes is seven. The top Basic grade S is eligible up to a maximum of field generation five. SE and E grades are eligible up to a maximum of six and seven field generations respectively. If the generation is not included on the official label, the potatoes concerned shall be considered as belonging to the maximum generation that is permitted within the respective grade.
